

Physician Assistant Prescriptive Authority
(OAC 435:15-11-1)

(a) A physician assistant who is recognized by the Board to prescribe under the direction of a supervising physician and is in compliance with the registration requirements of the Uniform Controlled Dangerous Substances Act, in good faith and in the course of professional practice only, may issue written and oral prescriptions and orders for medical supplies, services and drugs, including controlled medications in Schedules III, IV, and V pursuant to 63 O.S. §2-312 as delegated by the supervising physician and as approved in the Physician Assistant Drug Formulary (OAC 435:15-11-2).

(b) Any prescription for a pure form or combination of the following generic classes of drugs, listed in 435:15-11-2, may be prescribed, unless the drug or class of drugs is listed as excluded. Written prescriptions for drugs or classes of drugs that are excluded may be transmitted, only with the direct order of the supervising physician.

(c) Prescriptions for non-controlled medications are limited to a 30-day supply with two (2) refills of an agent prescribed for a new diagnosis. For patients with an established diagnosis, up to a 90 day supply with refills up to one year can be written and signed, or called into a pharmacy by a physician assistant.

(d) Prescriptions for Schedules III, IV and V controlled medications are limited to a thirty (30) day supply with no refills. In order for a physician assistant to prescribe a controlled substance in an out-patient setting, the physician assistant must be currently registered with the Drug Enforcement Administration and Oklahoma Bureau of Narcotics and Dangerous Drugs.

(e) A physician assistant may write an order for a Schedule II drug for immediate or ongoing administration on site. Prescriptions and orders for Schedule II drugs written by a physician assistant must be included on a written protocol determined by the supervising physician and approved by the medical staff committee of the facility or by direct verbal order of the supervising physician. In order for a physician assistant to prescribe and order a Schedule II controlled substance for immediate or ongoing administration on site, the physician assistant must be currently registered with the Drug Enforcement Administration and Oklahoma Bureau of Narcotics and Dangerous Drugs.

(f) A prescription issued by a physician assistant, whether written or oral, shall be the joint responsibility of the physician assistant and supervising physician. The supervising physician shall be responsible for the formulation and/or approval of all orders and protocols which allow the physician assistant to issue prescriptions. Questions concerning a prescription may be directed either to the supervising physician whose name shall appear on the prescription blank or to the physician assistant.

(g) All new drug entities will be restricted from the Drug Formulary, listed in 435:15-11-2, and added, if at all, only after review and approval by the Oklahoma State

Board of Pharmacy and the Committee, and subsequent approval by the Board. This restriction shall not apply to modifications of current generic drugs included on the Drug Formulary.

(h) Physician Assistants may not dispense drugs, but may request, receive and sign for professional samples and may distribute professional samples directly to patients in accordance with written policies established by the supervising physician.

(i) Physician assistants practicing in patient care settings that are part of the State Department of Health, State Department of Mental Health, or other special patient care settings designated by the Board are permitted to dispense medications directly to patients as directed by the supervising physician in written protocol, standing or direct order. Except for samples, Physician assistants may not dispense drugs in any other practice care setting.
