

**REQUIREMENTS AND PROCEDURE
FOR APPLYING FOR LICENSURE AS A REGISTERED ELECTROLOGIST**

EDUCATIONAL REQUIREMENTS:

ACADEMIC REQUIREMENTS FOR EXAMINATION AND LICENSURE

Persons applying for licensure must satisfactorily complete college courses in human anatomy, human physiology, microbiology and chemistry or equivalent courses. These courses must be comprehensive in content and designed for the allied health or biological-life science major. Satisfactory completion is considered a grade C or above. Medical terminology may be required at the discretion of the Board.

LICENSURE PROCEDURE:

1. If you think you meet the educational requirements for Licensure as an Electrologist, complete the attached Verification of Academic Requirements form and submit with an official copy of your Transcript of Grades and the application fee of \$60.00. Submit the completed form and supporting documentation to the Board of Medical Licensure and Supervision. Upon receipt of the completed application, you will be notified of the date and time you have been scheduled for an interview with the Committee.
2. Approved applicants will fulfill the curriculum of study and internship requirements under the direct supervision of a registered Electrologist who has been approved as a Preceptor. The internship includes successful completion of six months (minimum of 600 hours) of study and clinical practice under the direct supervision of a preceptor. At least 300 hours of the training must be conducted on-site and in-person at the training facility.
3. Upon satisfactory completion of the curriculum of study and internship requirements, the Preceptor shall submit to the Board a notarized completion report.
4. Upon satisfactory completion of the academic, curriculum and internship requirements, the applicant shall be eligible for the licensure examination in electrology. The applicant shall complete the remaining portions of the application and submit the application to the Board not later than forty-five (45) days before the date of the examination. Applications for the examination may be submitted prior to completion of the internship with verification from the supervising registered Electrologist that the applicant is expected to satisfactorily complete the remaining training. This does not waive the requirement for a notarized completion report as required in this section. The fee for the examination is \$75.
5. All applicants for licensure must request an **Extended Background Check (EBC)** by completing the online EBC Authorization Form.

6. The Board shall notify an applicant of his/her eligibility for examination at least 10 days prior to the next scheduled examination.

7. To qualify for a license, an applicant shall pass an examination, prepared by the Committee and approved by the Board, in the English language, which shall cover the following areas:

- (A) Human Anatomy
- (B) Human Physiology
- (C) Microbiology
- (D) General Chemistry
- (E) Dermatology
- (F) Hygiene
- (G) Sterilization
- (H) Electricity
- (I) Electrolysis (theory and practice)

8. If in the judgment of the majority of the Board, the examinee obtains an average of seventy-five percent (75%) on the total examination and not less than sixty-five percent (65%) in each subject on the examination, he or she shall be entitled to receive a license to practice electrolysis for the remainder of that calendar year.

9. The Chairman shall notify each examinee of the results of the examination within seven (7) days of the grade meeting held by the Committee to determine the pass/fail status of candidates. No matter what numerical or other scoring system the Board may use in arriving at examination results, the official notice of results to applicants shall be stated in terms of "pass" or "fail" in addition to numerical scores being provided. If an applicant fails to pass the examination a maximum of three (3) times, the individual shall not be permitted to re-apply for licensure. An examination fee must accompany each examination as set by the Board.

NOTE:

Please be advised that the licensure process can be a very long process as each step - education, internship and examination - must be reviewed by the Committee, recommendations made and action taken by the Board before advancement to the next step. The Committee meets three times each year. Any changes in law, rules or policy during the process toward licensure are effective immediately and will not exclude nor waive requirements for applicants enrolled in the process or contemplating such enrollment.

VERIFICATION OF ACADEMIC REQUIREMENTS FOR LICENSURE IN ELECTROLOGY

Print or type answers to all questions in full:

1. Name: _____
 last first middle

2. Mailing address: _____
 street city state zip

3. Birth date: _____/_____/_____ 4. Telephone: (_____) _____

(1) The Board accepts course work received from American colleges or universities that held accreditation, at the time courses were completed, by accepted regional educational accrediting associations as reported by the American Association of Collegiate Registrars and Admissions Officers.

(2) Degrees and course work received at foreign colleges and universities shall be acceptable only if such work could be counted as transfer credit from accredited colleges or universities as reported by the American Association of Collegiate Registrars and Admissions Officers.

(3) The relevance to the licensing requirements of academic courses, the titles of which are not self-explanatory, must be substantiated by the applicant through course descriptions in official school catalogs or bulletins or by other means acceptable to the Board.

(4) Persons applying for licensure must satisfactorily complete college courses in human anatomy, human physiology, microbiology and chemistry or equivalent courses. These courses must be comprehensive in content and designed for the allied health or biological-life science major. Satisfactory completion is considered a grade C or above. Medical terminology may be required at the discretion of the Board.

(5) The college courses in Human Anatomy, Human Physiology, Microbiology, and General Chemistry shall be comprehensive in content and designed for the allied health or biological-life science major. If a complete course is divided into more than one part, such as Human Anatomy and Physiology I & II, the applicant must satisfactorily complete all parts. Satisfactory completion shall be defined as a grade of C or its equivalent, or above (grade of A or B).

(6) Attach transcripts and course descriptions from official college catalogs or bulletins as required.

An incomplete application form will not be accepted; it will be returned to you to be completed. If you have any questions about this application form, call the Board of Medical Licensure and Supervision at (405) 962-1400.

I _____ hereby certify under oath that I am the person named on the verification of academic requirements for licensure in electrology and lawful possessor of the college diploma and transcripts submitted herewith, and that I am over twenty-one (21) years of age.
