

Oklahoma State Board of Medical Licensure and Supervision

Your Message Has Been Received

We apologize that the Oklahoma Medical board is currently “work location” compromised with the licensing staff due to the Pandemic. With the current events, most of us are working from home and may not be able to answer our phones in a timely manner. Please know and understand that we are working as efficiently as we can. We want to get health professionals licensed and working as fast as possible. Phone calls, snail mail and faxes can slow the licensing process down considerably!

PLEASE USE EMAIL TO CORRESPOND WITH US. Emails ARE much faster and less interruptive in the licensing process. **PLEASE SCAN DOCUMENTS AND EMAIL TO US.** Every piece of mailed, faxed information or when dropped by the agency in person is a slower process due to in-office scheduling.

We want you to come to Oklahoma to practice **SO** help us during this time to protect the citizens of this state by helping us do our *due diligence* and *prompt* licensure process **BY USING EMAIL** for all of your communication.

Please understand this agency processes an average of 2,300 applications each year and renews over 25,000 licensees annually. **EMAILS** are managed by the same individuals who process licensure applications. **Duplicate emails, phone calls and faxes reduce the amount of time these individuals have to process YOUR application.** Please be assured that the information included with your EMAIL will be collected and documented.

If the email submitted includes information pertaining to a pending application, please be advised that updates to applications will be reflected on the * **[“Check the Status of a Pending Application”](https://secure.okmedicalboard.org/applicant/signin)** portal at <https://secure.okmedicalboard.org/applicant/signin>

*All applicants will receive a letter with their specific PIN to check their application status on-line. The applicant should share their PIN with their authorized contact person so that they can check the application online portal as well. If an application has been submitted but you have not yet received a PIN to check the application status, it is because the application is still being processed. The PIN will be sent as soon as the checklist has been created.

The staff of the Oklahoma Medical Board appreciates your cooperation and patience.

Lyle R. Kelsey, Director
Oklahoma Medical Board
